This are well be a supposed to					
Things you will be exposed to					
Processes and facilities					
Processes and plants for few representative chemicals* from each sector. Their comparison.					
Specific processes: Reformers, Gas cracker, Refinery opreations- FCC, platforming, Coking, Crude distillation, Hydroprocessing					
Facilities/techniques: Oil exploration, Coal mining, Salt works, Jetty for oil/product shipment					
Equipmment/Operations					
Mass transfer: Distillation; absorption; Extarction; cooling towers					
Heat Transfer: Different types of Heat exchangers (S&T Plate); Multiple effect evaporators; ATFE, thermosyphon reboilers					
Process control: DCS system for plant operation and control					
Power plant: Turbines, generators, Boiler steam tube panels; Coal handling system					
Reactors: Different types of catalytic/non-catalytic reactors; packed and fluidised beds, stirred tanks, gas-liquid and gas-solid reactors					
Chemicals of Interest*					
Petrochemicals: Ethylene oxide, Polyethylene, PVC, polypropylene, PET					
Fertilizer Industry: ammonia, urea, methanol, sufuric and nitric acid, phospate fertilizers					
Agrochemicals: carbon disulphide, pendimethylene					
Inorganic Chemicals: soda ash, caustic, chlorine, table salt					
Dyes, APIs, perfumery and coating intermediates					
Other					
Techno-commerical aspects of chemical manufacture and business: Views of Practising Chemical Engineers and managers					
A session with first generation entrpreneurs in Chemical Sector
